

A bit of Magical Thinking!

Most famous for losing to Bobby Fischer, the 10th World Champion has not had the same deep attention as those coming before and after him. This changes now with the first of two volumes by the biography master.

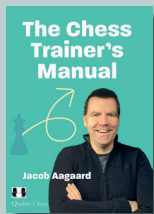

In a two-book project, IM Renier Castellanos presents an exciting modern repertoire against all 1.d4 lines. The Spaniard may have his final GM-norm before the books are out.

Test and entertain yourself with puzzles from the Petrosian Award-winning trainer of a generation of elite Czech players. After reading this book you will view chess tactics in a whole new way.

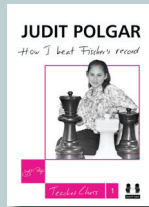

In this valuable addition to chess training/improvement literature, GM Alexander Galkin delves deeply into the topic of what makes a winning chess mindset, discussing his work with later World Junior Champion Aleksandra Maltsevskaya.

Grandmaster Jacob Aagaard is one of the best known chess trainers in the world today. In this simple manual, he presents his approach to teaching chess to amateurs, talents and professionals alike.

7 wins in 19 years!

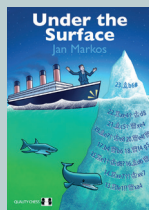

Many books from Quality Chess have won awards, but the most prestigious has always been the ECF Book of the Year. Quality Chess has won more times than New in Chess (5 times) in second.

In 2024 we will turn 20 and hope to celebrate it with lots of high-quality chess books! Like most years, the next looks to be our best one yet!

Training & Thinking

Axel Smith The Woodpecker Method 2

Swedish GM Axel Smith returns with a sequel to his colossal bestseller on the tactics of the World Champions. This time he has found 1000 foundational positional exercises and prepared them for woodpecking.

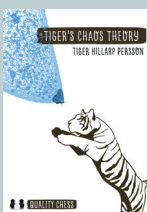

Sam Shankland GM Training Camp 2 – Attack!

You are invited to participate in a training camp with 2018 US Champion, twice Olympiad gold medalist and super-GM Sam Shankland, where you get to solve with Sam, and compare your solutions.

Jacob Aagaard A Friendly Guide to Attacking Chess

No one can explain difficult topics in as simple a way as GM Jacob Aagaard. In this new series he will break down different topics into easy digestible chunks, starting with the principles of attacking play.

Tiger Hillarp Persson Tiger's Chaos Theory

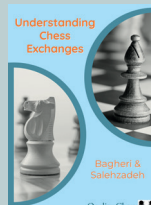

Swedish GM Hillarp Persson is deeply interested in two questions regarding chess: What is the truth and how do you win games? This has led him to investigate the limits (and beyond) of creativity and intuition in chess.

Mihail Marin Learn from the Legends 2

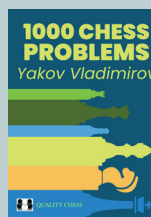

20 years after his award-winning and perennial bestseller, *Learn from the Legends*, Mihail Marin is back with the same winning formula applied to a new set of chess legends.

Exchanges & Tactics

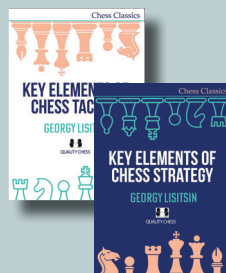

Bagheri & Salehzadeh Understanding Chess Exchanges

GM Bagheri and his long-time coach share their expert insights into using exchanges as a strategic weapon. Numerous exercises from elite play will test your new-found knowledge.

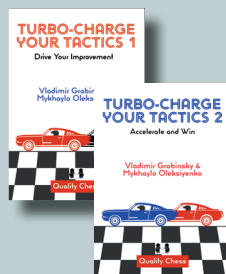

Yakov Vladimirov 1000 Chess Problems

Yakov Vladimirov is one of the giants in the world of chess problem composition. This selection of classic and modern chess problems is a must-have for all fans of imagination in chess.

Georgy Lisitsin Key Elements of Chess Tactics Key Elements of Chess Strategy

The Master of Leningrad's two defining works are made available in English. Fully updated and revised, these books are perfect for those interested in chess history, as well as those who just want to improve.

Oleksiyenko & Grabinsky Turbo-Charge Your Tactics 1&2

Join the two most famous contemporary Ukrainian trainers and writers on a journey into the wonderful world of chess tactics. Their collection and approach is destined to provide joy, inspiration and a great potential for improvement.

Technique and Strategy

Cyrus Lakdawala Exploiting the Two Bishops Exploiting a Space Advantage

In a new series, the well-respected American author will provide his trademark clarity and humour to go deep into well-established, but rarely understood, topics of chess strategy.

Sam Shankland Converting an Extra Pawn

Winning a won position is not “a matter of technique” alone, but a matter of knowledge, skill and calculation. Shankland bares all in this in-depth look at converting the most tangible small advantage, that of the extra pawn.

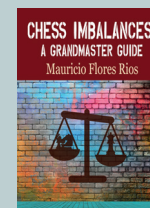

Ivan Cheparinov Pawn Sacrifices in the Middlegame

The Bulgarian GM, occasional 2700+ player and second for Topalov in his most successful period, gives the definitive guide to throwing the small bits at your opponent.

Julen Arizmendi Strategic Conclusions

GM Arizmendi is the leading Spanish trainer. He has thought a lot about how we improve the understanding of our strategic game, and his insights and conclusions are unmissable.

Mauricio Flores Rios Chess Imbalances – a GM Guide

In this long-awaited follow-up to his sensational debut, Flores Rios takes an in-depth look at various types of imbalances in chess and makes them comprehensible.
